Subject: Aurora Airport

Greetings City of Wilsonville,

I fully support improvements at the Aurora Airport. A longer runway will increase safety for the pilots, passengers and others near the airport. A longer runway gives a pilot more options if something goes wrong during takeoff or landing.

Aurora airport is also being used a lot by bigger aircraft and they need the extra length. Those bigger aircraft represent a lot of money, jobs and opportunity and need your support.

Aurora airport is in a special location, close to the Portland area but not close enough to interfere with the large volume of air traffic utilizing PDX. Improvements to the Aurora airport would be a positive step towards better infrastructure in the future.

Thank you,

John Huntsman
